Your Touchstone Energy® Cooperative 

Renewable Energy Program Sign-Up Form

Through our whole-sale power provider, Tri-State Generation & Transmission, we can purchase blocks of green power for resale to our members.

The details of the program are as follows:

- Green power will be sold in 100 kWh blocks.
- A member can purchase any number of blocks.
- Current cost of each block is \$0.40. This charge will be in the form of a surcharge and will be on top of the normal rates for that number of kWh's.
- You must commit to the program for a one year period as a minimum.
- You will be billed for the number of blocks you commit to regardless of your actual kWh consumption.
- Prices are market-based and are subject to change.

If you are interested in participating in the program, please fill out the information below and return it to our office. If you have any questions, please feel free to contact Linda at (719) 395-4589 or (800) 933-3823. You can also email me at nyberg@myelectric.coop. Please put Renewable Energy Program in the subject line.

Name: _____ Account #: _____

Address: _____

City: _____ State: _____ Zip Code: _____

I commit to purchase ____ block(s) of green power and have a surcharge of \$0.40 per block added to each monthly bill for a minimum period of one year.

Signature: _____

Unless you object, SDCEA can use your green power purchases to help us meet our annual renewable energy requirements as dictated by Colorado law. Please check below only if you DO NOT want your blocks counted toward SDCEA's total. Use of consumer green power purchases to meet those requirements may help to defray rate increases that may be necessary to meet renewable energy mandates.

____ No, I will not allow SDCEA to use the renewable energy credits associated with my purchase of renewable energy blocks.
